

## SUSTAINABLE SOLUTIONS FOR PACKAGING

*Allow us to work with you to develop sustainable packaging solutions for your products. We are committed to creating planet friendly products that will positively impact our environment as well as our customer brands green footprint initiatives.*

*We carry recycled and recyclable materials that can be used as base material for packaging concepts, such as:*

- *Seed Paper Materials*
- *Soy based inks for printing*
- *Organic paper substrates from bamboo as well as 40% to 100% recycled paper*
- *Biodegradable materials for bags*
- *Plant based (sugar cane), Compostable, Biodegradable and 40% Poly materials for packaging*
- *Recycled yarns based on ocean material recovered plastics for our woven labels*
- *Hemp based materials*

end2end offers a FSC certified print facility with FSC papers, bamboo papers and tree-free papers. Soy-based inks can be used for printing as well.

100% recycled warp yarns are available for our woven labels. For printed labels, we offer organic cotton, corn fabric, and bamboo fabric tapes as well as soy-based inks.

Zippers can be produced using PET tape or organic tape.

Even our heat transfers are free of all toxic elements such as Phthalates, Formaldehydes, etc. and are on a biodegradable paper carrier.

Together, we can all make a difference!
