SERVICE & SUPPORT

Print & Apply

XPA 934

The new generation of Print & Apply Systems

- Excellent print results in real time
- Maximum user-friendliness
- Highest flexibility for integration
- 100 % tool-free maintenance
- Web interface for mobile device management
- Robust, industrial housing

Models

XPA 93x

ALX 92x

ALX 73x

Labelers

XLS 2xx

The intelligent industrial Labeler for highest flexibility

- Perfect application of decorative and informative labels
- For demanding 24/7 non-stop use
- Label widths up to 233 mm
- Apply speeds of up to 70 m/minute
- Compact design, easy integration into production lines
- Tandem function for non-stop production
- IP 65 protection against water and dust

Models

XLS 2xx

ALS 30x

Printing Systems

XTO

Thermal Transfer Overprint how it should be

- Direct printing on flexible packaging foil, high print volumes, highest efficiency
- Maximum user-friendliness, tool-free maintenance
- Can easily be combined with our XLS Labelers

Models

XTO

DPM/PEM

DPM / PEM

Industrial Print Modules for integration in OEM Print & Apply Systems

- 400 mm/s print speeds, Ribbon Save Function, RFID UHF enabled

Applicators

APPLICATORS

Exact application of labels on products, cartons or pallets

- Can be easily mounted on our models
- Suitable for a wide range of label materials, surfaces (soft, hard, uneven, smooth), heights (constant or variable), various positions (top, bottom, side, around corners) and different conveyor speeds

Service & Support

SERVICE & SUPPORT

With many years of experience, expert knowledge and enthusiasm

- Complete consulting on identification solutions
- Service-Hotline
- On-site technical service
- Service and maintenance contracts
- NOVEXX Solutions Repair Center
- NOVEXX Solutions Training Center

Label Printers

XLP 50x

The allround Label Printer for every print challenge

- Best print quality for barcodes, fonts and graphics
- 200, 300 and 600 dpi print resolution on all label materials
- Label width from 15 mm to 185 mm
- Direct thermal printing and thermal transfer printing mode
- Many options for multiple applications: knife, rewinder, applicator, dispenser
- Cut- and stack option for textile- and garment labels

64-0x

The industrial Label Printer for high volume label printing

- Print speed up to 400 mm/s
- Up to 254 mm material width
- 600 meter ribbon roll for more efficiency and uptime
- Ribbon Save Function significantly reduces ribbon consumption
- Many options for multiple applications: knife, rewinder, applicator, dispenser, RFID UHF
